

# Travel Risk Management self-assessment

Your Summary - abc

**You scored 100%**

You are well progressed in the design and maturity of your risk mitigation program for globally mobile employees. Minor improvements and ongoing monitoring is appropriate by the responsible cross- functional team.

## Integrated Travel Risk Mitigation, a Duty of Care Plan-Do-Check approach

International SOS commissioned the first ever Duty of Care whitepaper. This reviews employers Duty of Care responsibilities and offers guidelines for the development of appropriate risk management strategies.

Following this sector first, our clients requested more research, tools and advice. Resulting in the commission of our Duty of Care and Travel Risk Management Global Benchmarking Study the first comprehensive and authoritative research publication on the topic.

The paper outlines a framework for organisations to ensure they are adequately meeting their Duty of Care obligations. The framework follows the 'plan-do-check' approach.
